Dear Sirs, As an XM Satilite radio subscriber I strongly oppose any interference or regulations against this system. I'm a cross country truck driver and XM Satilite radio provides an exellant service for us, from entertainment, to news, to the road and weather up dates. As a driver who depends on actual and accurate information this is a great service to me and about 500,000 other truck drivers out on the open highways trying to make a living and deliver freight accross this country. The instant weather and traffic reports we get on our system are invaluable and do us a great service. I for one would like to see them add a few more city's to their list.

I understand that XM Satilite radio is the new kid on the block, so to speak, but it is growing more every day. It is also the first ever system that does a first rate service for it's subscribers. I have had mine since the start up of it and know of its worth. I pay for my service, to have the entertainment and important information at hand when I need it. The N.A.B. needs to get a real life and quit wasting your valuable time. If the CEO's And EXE.'s of the N.A.B. are so afraid of their job's then maybe they should step up and come up with so inovations of there own to compete. Other wise the whole bnch of them are incompetant and should be replaced.

Please Gentlemen, we need no restrictions on XM Satilite radio. It is doing a great service to it's listeners and should be Congradulated. I strongly oppose the House Bill HR 4026.

time,

Thank You for your

Dave Schumaker
